**POLLEN AIR FILTER
PLUS FREE HEALTH CHECK**

Your Mazda is equipped with a Mazda Pollen Air Filter,* that reduces dust, dirt and other particulates from entering the air conditioning system, leaving fresh air inside the cabin of your vehicle.

Over time, the accumulation of these impurities blocks the Pollen Air Filter which decreases airflow to the vehicle cabin. This can result in reduced Air Conditioner performance and may lead to unpleasant odours, creating an uncomfortable cabin environment.

Mazda Cabin Air Filters reduce:

- Exhaust particulates
- Moulds, pollen and allergens
- Smoke and unpleasant odours

We can change all that by fitting your vehicle with a new Mazda Pollen Air Filter. Installation is free and only takes a moment. And while we are at it, we'll give your Mazda a FREE Health Check to make sure it's running at optimum levels. Phone Hamilton (07) 849 9871 or (07) 849 9875, Matamata (07) 888 7127 or Cambridge (07) 827 7525 to book a time that suits you.

But hurry! This offer ends 30th June 2014.

*Note: Some earlier models may not be equipped with a Pollen Air Filter.

This offer only applies to the following Mazda models: Mazda2 2007-2010, Demio 2007-2011, Mazda3 2003-2010, Axela 2003-2011, Mazda6 2002-2010, Atenza 2002-2011.
